nottsclassic –
bibLATEX-style of the Classics Department, Nottingham (GB)*

Lukas C. Bossert†   William Leveritt

Version: 0.1 (2016-06-30)

Abstract

Bibliographical style called *nottsclassic* which works according to the guideline of the Classics Department of the University of Nottingham (GB).

1   Usage

nottsclassic   The name of the bibLATEX-style is `nottsclassic` has to be activated in the preamble.

```
1  \usepackage[style=nottsclassic,%
2              ⟨further options⟩]{biblatex}
3  \bibliography{⟨bib-file.bib⟩}
```

At the end of your document you can write the command `\printbibliography` to print the bibliography. Further information are found below (section 3).

2   Overview

\cite   As always citing is done with `\cite`:

```
1  \cite[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

⟨*prenote*⟩ sets a short preliminary note (e. g. "e. g.") and ⟨*postnote*⟩ is usually used for page numbers. If only one optional argument is used then it is [⟨*postnote*⟩].

```
1  \cite[⟨postnote⟩]{⟨bibtex-key⟩}
```

The ⟨*bibtex-key*⟩ corresponds to the key from the bibliography file.

\cites   If one wants to cite several authors or works a very convenient way is the following using the `\cites`-command:

---

*The development of the code is done at https://github.com/LukasCBossert/biblatex-nottsclassic.
†lukas@digitales-altertum.de

```
1  \cites(pre-prenote)(post-postnote)[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
2                                     [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
3                                     [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}…
```

\parencite   Sometimes a citation has to be put in parentheses. Therefore we implemented the command \parencite:

```
1  \parencite[⟨postnote⟩]{⟨bibtex-key⟩}
```

This cite command takes care of the correct corresponding parentheses and brackets. Especially in @Inreference citations the parentheses are changing to (square) brackets.

\parencites   Of course there is also the possibility to cite several authors/works in parentheses. This is done with \parencites:

```
1  \parencites(pre-prenote)(post-postnote)[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
2                                          [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}%
3                                          [⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}…
```

\citeauthor   Furthermore and additionally to the ›normal‹ \cite-commands one can also cite only
\citetitle   the author or the work title in the text and in the footnotes.

```
1  \citeauthor[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

and for the works

```
1  \citetitle[⟨prenote⟩][⟨postnote⟩]{⟨bibtex-key⟩}
```

3   Bibliography

\printbibliography   But first we define the heading of the whole bibliography:

```
1  \printbibheading[%
2                   heading=bibliography,%
3                   %heading=bibnumbered,% if you want it numbered
4                   title={Bibliography}] %heading for bibliography
```

You can give any title you would like to give (title = {⟨any title⟩}).

The next step is to set up the bibliography for the ancient authors.

Finally the bibliography:

```
1  \printbibliography[%
2                     heading=subbibliography,
3                     %heading=subbibnumbered,% if you want it numbered
4                     title={Secondary literature}]
```
